

**Wednesday, October 8 program
Old Town Museum at 5 p.m.**

***Maine
Mature
Drivers Project***

Tom Meuser

The MMDP presentation strives to inform older adults how aging-related changes in health and function may impact on driving safety, how the Maine DMV addresses medical-fitness-to-drive concerns, and how older drivers may self-regulate to remain safely behind the wheel OR make a smooth transition into driving retirement.

Presenter Tom Meuser is a clinical psychologist, applied gerontologist, and social scientist based in Portland, Maine. He moved here in 2018 to serve as the Founding Director for the New England Center for Excellence in Aging and Health. He retired from that role in 2024 and is now self-employed as a geriatric neuropsychologist.

The Old Town Museum is located at 353 Main St., Old Town
